SUMMARY

Versatile and highly motivated Full Stack Developer with expertise in both frontend and backend technologies, including Spring Boot, Thymeleaf, Bootstarp, Tailwind, MySQL & MongoDB and Data Structures and Algorithms. Skilled in building dynamic, scalable web applications and delivering efficient full-stack solutions. Seeking an entry-level full stack development role to leverage my technical skills and contribute to high-impact projects.

WEBSITES, PORTFOLIOS AND PROFILES

- GITHUB Profile   : https://github.com/ManojB45

FUNCTIONAL SKILLS

- JAVA (Spring Boot)
- HTML 5, CSS 3, JavaScript
- API Design & Integration: REST APIs, working with JSON data, handling API and authenticate using JWT
- Database Management System
- Performance optimization
- CSS Frameworks
- Frontend Build Tools
- MySQL SQL databases, MongoDB NoSQL databases, designing schemas and performing CRUD operations.
- Testing and Debugging.

CERTIFICATIONS

- JAVA Full Stack Development (Duration: July 2024 – September 2024) – GUVI

SKILLS

FRONTEND
- **Languages**: HTML 5, CSS 3, JavaScript
- **Frameworks/Libraries**: Thymeleaf, React.js
- **CSS Frameworks/Preprocessor**: Bootstarp, Tailwind
- **Responsive Design**: Media Queries, Flexbox, Grid Layout

BACKEND
- **Languages:** Java, Node.js (JavaScript), Php (Basics)
- **Frameworks:** Spring Boot
- **API Development:** REST APIs
- **Relational Databases:** MySQL
- **NoSQL Databases:** MongoDB
- **ORM Tools:** Hibernate, JPA

TECHNICAL PROJECTS

Employee Management System Application (Mini Project 1):

- **Technologies Used:** Spring Boot, Spring JPA, Spring Junit Testing, MySQL, Dev Tools, Thymeleaf, Bootstarp
- **Description:** Built a full stack Employee Management application where users can perform all the CRUD operations. Implemented Junit testing and developed a REST API for backend operations using Spring Boot Framework and for frontend Thymeleaf is used for UI and Bootstarp is used for styling and for database MySQL is used.
- **Outcome:** Gained experience in integrating Spring Boot REST APIs controller's backend, Thymeleaf and Bootstarp frontend and managing MySQL databases.

Patient, Doctor 's Medications and Appointments Management Application (Mini Project 2):

- **Technologies Used:** Spring Boot, Spring JPA, Spring Junit Testing, MySQL, Dev Tools, Thymeleaf, Bootstarp
- **Description:** Built a full stack Doctor, Patient's Medications and Appointments Management application where users can perform all the CRUD operations. Implemented Junit testing and developed a REST API for backend operation using SpringBoot CRUD Framework and frontend Thymeleaf is used for UI Bootstrap is used for styling and for database MySQL is used.
- **Outcome:** Gained experience in integrating Spring Boot REST APIs controllers, Junit testing backend, Thymeleaf and Bootstarp frontend and managing MySQL databases.

Online Bus Ticket Booking and Management Application (Capstone Project):

- **Technologies Used:** Spring Boot, Spring JPA, Spring Junit Testing, MySQL, Dev Tools, Thymeleaf, Bootstarp
- **Description:** Built a full stack Online Bus Ticket Booking and Management application where users can perform all the CRUD operations. Implemented Junit testing and developed a REST API for backend operations using Spring Boot Framework and for frontend Thymeleaf is used for UI and Bootstarp is used for styling and for database MySQL is used.
- **Outcome:** Gained experience in integrating Spring Boot REST APIs controllers, Junit testing backend, Thymeleaf and Bootstarp frontend and managing MySQL databases. Also gained better frontend development and user interface

EDUCATION

Jain Institute Of Technology   **Davangere-577003**
2019-2022
Bachelor's Degree of   Mechanical Engineering
